Call **718-544-5997** to RSVP

Notes on Chinese Medicine

Chinese medicine has been effective in the treatment of a variety of health concerns for thousands of years. In recent years, Western medical practitioners are recognizing the benefits of incorporating Acupuncture into various medical procedures and stages of life. Acupuncture, Herbal medicine and Chinese diet therapy can support a couple through various stages of fertility treatments, pregnancy, labor and delivery and also in post-partum care. This seminar will explain how acupuncture works and how it can be of most help to a woman in her reproductive years in addressing various gynecological conditions and fertility treatments.
